CAT® S61

THERMAL BY  FLIR

The Cat® S61 smartphone is built to be rugged and robust, to take on whatever elements, challenges or tasks you throw at it. It's the upgrade to your Cat S60; bigger, bolder, braver than ever before.

We've taken the integrated thermal imaging camera from the S60 and given it an upgrade. Its enhanced software makes the resolution of thermal images twice as good, it can now read temperatures up to 400°C and it can live stream thermal video back to base. And, there's more. It boasts an indoor air quality sensor to alert you to high levels of indoor air pollutants (VOCs) in your environment and it is the world's first smartphone with integrated laser assisted distance measurement.

Let's not forget its world leading IP68, MIL-Spec 810G rugged credentials – drop proof up to 1.8M onto concrete, waterproof up to 3M for 60 minutes, including salt water, and resilient to all types of dust. Complete with a large capacity 4500mAh battery, this tool is the most advanced, most skilled and most loyal partner you need to get any job done.
